Reference for Basim Mousilli

To Whom It May Concern

Basim has worked in the Darat (Land) asset in BSP for 18 months from mid 2008 through to the end of 2009. He was tasked with the conceptual design, detailed planning and execution phase for the creation of a Collaborative Work Environment (CWE) for the Darat asset.

Through the course of this period, Basim has displayed competencies, capabilities and behaviours which belie his youth. He has outstanding skills in the areas of project management, stakeholder engagement, process analysis and team leadership. During the design phase he mastered, mapped out and then simplified complex workflows and interface needs. He has become very knowledgeable about well and reservoir management processes and tools. He engaged widely across the company and created a CWE design which addressed the core areas as simply as possible. During the execution phase he lead a dispersed team displaying superlative project management skills which resulted in the project being delivered on schedule and under budget.

It has been a pleasure work with Basim. He has a great approach to teamwork and is extremely responsive to the needs of his key stakeholders. He has always maintained a highly professional approach to information sharing and feedback. He is creative and adept at improving the product but also flexible to allow change when asked for by others. I would not hesitate to recommend him. If needed, I can be contacted through my e-mail below.

Yours faithfully,
For BRUNEI SHELL PETROLEUM COMPANY SENDIRIAN BERHAD
